

1. If you are presented with this dialogue box, please select "Organizational Google Apps Account".

2. Change your password by first selecting your account icon in the upper right, then the "My Account" button

3. Under "Sign-in & security", select "signing in to Google"

4. Enter a "Recovery email address" (#1) and a "Recover phone" (#2), then click on the arrow beside "Password" (#3)

## Sign-in & security

### Signing in to Google

Control your password and account access, along with backup options if you get locked out of your account.

#### Make sure you choose a strong password

A strong password contains a mix of numbers, letters, and symbols. It is hard to guess, does not resemble a real word, and is only used for this account.

#### Password & sign-in method

Note: To change these settings, you will need to confirm your password.

Password

3

Last changed: [blurred]

#### Account recovery options

If you forget your password or cannot access your account, we will use this information to help you get back in.

Recovery email

1

Recovery phone

2

5. You may be requested to re-enter your initial password.

Please re-enter your password

[Sign in with a different account](#)

6. Enter your new password (#1) and then again to confirm (#2). Please use a minimum of six characters and use a combination of capital, lower case, numeric, and special characters.

## ← Password

Choose a strong password and don't reuse it for other accounts. Changing your password will sign you out of all your devices and your new password on all your devices.

1

New password

#### Password strength:

Use at least 8 characters. Don't use a password from another site, or something too obvious like your pet's name. [Why?](#)
